## # Documentation

[![Packagist Version](https://img.shields.io/packagist/v/jv-conseil/dkim-php-mail-signature?color=orange){}] (https://packagist.org/packages/jv-conseil/dkim-php-mail-signature) [![Donate with PayPal](https://img.shields.io/badge/Donate-PayPal-green.svg){}] (https://www.paypal.com/cgi-bin/webscr?cmd=\_s-xclick&hosted\_button\_id=P3DGL6EANDY96&source=url) [![License BSD 3-Clause](https://img.shields.io/badge/License-BSD%203-Clause-blue.svg)](LICENSE) [![Follow JV conseil – Internet Consulting on Twitter](https://img.shields.io/twitter/follow/JVconseil.svg?style=social&logo=twitter){}] (https://twitter.com/JVconseil)

Documentation is [available online](https://jv-conseil-internet-consulting.github.io/dkim-php-mail-signature/classes/JVconseil.DkimPhpMailSignature.DKIMconfig.html), though it may not be quite up to date or match your version exactly.

You can generate API documentation by running *phpdoc* in the top-level folder of this project, and documentation will be generated in this folder: `` php ~/vendor/bin/phpdoc -d ~/dkim-php-mail-signature/ -t ~/dkim-php-mail-signature/docs/ ``

You will need to have [phpDocumentor](https://www.phpdoc.org) installed.

## # Sponsorship

If this project helps you reduce time to develop, you can give me a cup of coffee :-)
